

TECHNICAL DATA SHEET

SUCTION CUP

Single Drum Suction Cup:

Designed for small-format tiles, marble, granite, and glass. Provides secure grip for lifting, placing, and adjusting tiles during installation. Ideal for precise alignment and preventing surface damage.

Double Drum Suction Cup:

Built for large-format tiles and heavy materials. Dual suction offers stronger grip and better balance during lifting and placement. Suitable for handling larger panels with improved stability and control.

Triple Drum Suction Cup:

Heavy-duty tool for extra-large tiles and big slabs. Triple suction system ensures maximum holding power and even weight distribution. Ideal for safe handling of large, heavy surfaces during installation.

ADVANTAGES

- **Lifting and Positioning Tiles:** Helps safely lift and place tiles without damage.
- **Handling Large Tiles:** Provides a secure grip on heavy or oversized tiles.
- **Aligning Tiles:** Assists in adjusting tiles for proper alignment.
- **Reducing Breakage Risk:** Minimizes the chance of tiles cracking during handling.
- **Ensuring Clean Installation:** Prevents fingerprints and adhesive marks on tile surfaces.
- **Removing Installed Tiles:** Allows easy removal of tiles without causing damage.

WHEN YOU USE SUCTION CUP

1. Safe Handling
2. Easy Lifting
3. Improved Precision
4. Reduced Strain
5. Cleaner Installation
6. Damage Prevention

WHEN YOU DON'T USE SUCTION CUP

1. Increased Risk of Tile Breakage
2. Difficult Handling of Large Tiles
3. Misaligned Tiles
4. Physical Strain and Fatigue
5. Adhesive Marks and Fingerprints
6. Higher Chance of Tile Damage

Compact Design

Available in Different Sizes

Ideal For Medium-Weight Tiles

Strong Suction Power

High-Quality Rubber Cup

Quick Release Mechanism
