

# TECHNICAL DATA SHEET

## TILE LEVELING SYSTEM

CLIPS | WEDGES | PLIER

The **Tile Levelling System** is designed to eliminate lippage and uneven tile edges. It holds tiles firmly in position during installation and speeds up the levelling process. Ideal for professionals and DIY installers, it ensures a clean, accurate, and professional finish.

- **Clips:** Available in **2mm, 3mm & 4mm** (100 pieces per packet)
- **Wedges:** Reusable (100 pieces per packet)
- **Plier:** For accurate pressure application

### ADVANTAGES

- **Maintains Consistent Gaps:** Ensures uniform joint spacing.
- **Prevents Tile Shifting:** Minimizes tile movement during setting.
- **Improves Alignment:** Prevents lippage between tiles.
- **Allows Grout Application:** Reduces installation time and rework.
- **Enhances Aesthetic Finish:** Achieves a premium, professional look.

#### WHEN YOU USE LEVELLING SYSTEM

1. Uniform and even tile surface
2. Faster installation
3. Precise alignment of all tiles
4. Fewer tile breakages during curing
5. Enhanced aesthetics and durability

#### WHEN YOU DON'T USE LEVELLING SYSTEM

1. Visible lippage and uneven tiles
2. Slower and more labor-intensive
3. Irregular joint lines
4. Increased chances of cracking
5. Compromised finish and look

Time Saving

Reduced Tile Breakage

Prevents Lippage

Improved Accuracy

Simple to Use
